## PERFIL

Full stack developer with studies in engineering, as a programmer I feel comfortable working in the front or back-end, I've learned more front-end technologies and I have more experience in data analysis in SQL with Python in the back-end side.  
I have job experience in customer service and management.  
Proactive, responsible, pragmatic, oriented to teamwork and achieve goals, enthusiastic about technology.  
Now learning about IA implementation in projects, and software development in general, open to work.
